

BCSRT BOD Election: President Elect

Bryanne-Leigh Brosseuck

I have been a Respiratory Therapist for 10 years at Royal Columbian Hospital, where the last 5 years have been focused on growing in leadership roles as Clinical Site Coordinator, Staff Educator, and now Clinical Supervisor. My clinical experience also includes past work in the community providing home oxygen, as well as working as a locum in Yellowknife.

In addition to my clinical practice, I have been actively involved in advancing our profession provincially. For the past three years I have served as Director of Education for the BCSRT, and helped establish the RTEBC as an initial co-chair. I have also co-chaired shared work teams within my health authority developing educational resources and practice guidelines, and contributed to the TRU Program Advisory, helping shape respiratory education at the post-secondary level. Professional development includes multiple education and leadership courses, along with certification as a BLS Instructor.

I am passionate about ensuring patients receive the highest quality of care while protecting the autonomy of RTs in BC. Equally important is the commitment to creating a profession where all RTs, whether in acute care, diagnostics, or community practice, feel included, valued, and represented.

If elected, my priorities will be to strengthen professional unity, expand access to educational opportunities, and guide our profession through the transition into a professional college. My focus will be on ensuring this process is transparent, supportive, and strengthens the role of Respiratory Therapists within the healthcare system.

Outside of work, I enjoy traveling and exploring local adventures with my two dogs.

Ingrid Hakanson

Ingrid began her career as a Respiratory Therapist (RT) in 2007, providing bedside care at Vancouver General Hospital (VGH). In 2018, she transitioned to the role of VGH staff educator, contributing to the ongoing professional development of RTs. Subsequently, Ingrid advanced into professional practice within the Richmond CoC. Two years ago, she expanded her expertise by taking on regional RT community services for Vancouver Coastal Health (VCH), overseeing seven diverse programs. Her practice, which spans extensive geographical areas and the entire continuum of care, offers her a comprehensive and unique perspective on the breadth and depth of Respiratory Therapy practice.
